

How-to-upgrade-itel-smart-phone

Note:

1.Before upgrading the device, need to make sure your phone power is over 5%.

2.Please confirm that the current date is consistent with the system display date

3.When upgrading A11, P11, Prime 4 and P12, press the volume down button, and then connect the USB cable

You will need these two files for upgrade

1. **Driver_Auto_Installer_EXE_v5.1632.00**

Or DRIVERS_R4.18.2102(A11, P11, Prime 4, P12 need)

2. The Upgrade file(Contains ROM file and upgrade tool)

Steps

1. Install the driver

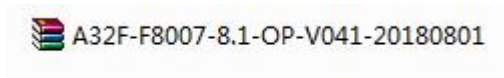

A11, P11, Prime 4 and P12	 DRIVERS_R4.18.2102
Other project	 Driver_Auto_Installer_EXE_v5.1632.00

Caution: Before installment, disable Antivirus service as driver file could probably be mistaken as virus.

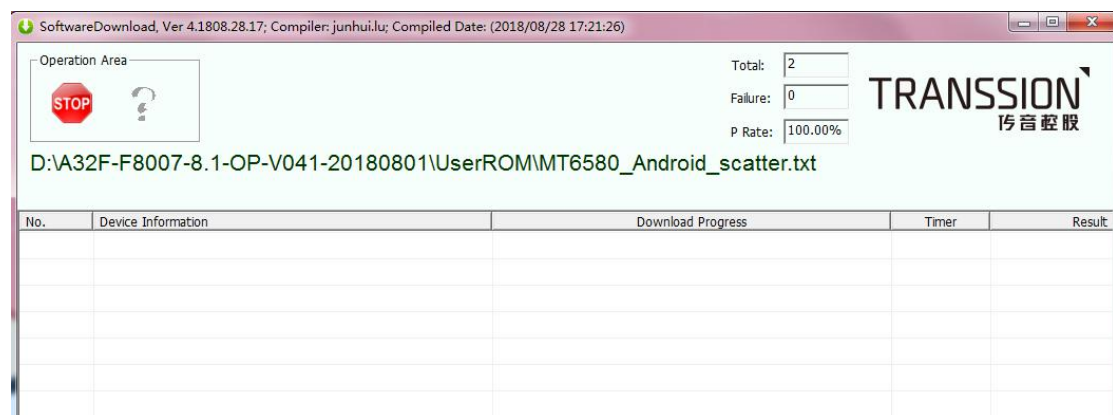

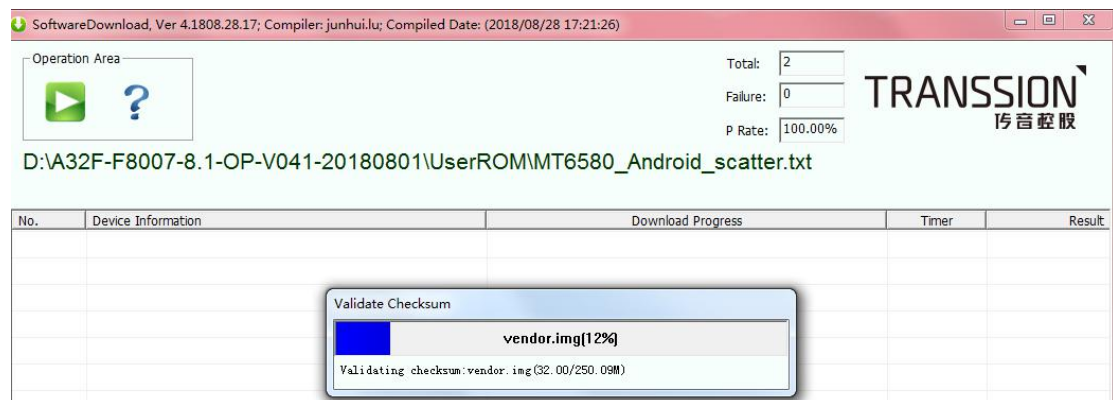

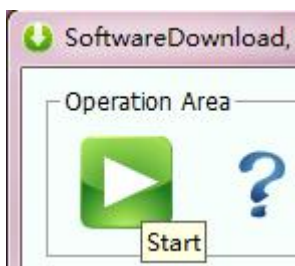

2. After installing the driver, restart your computer.

3. Open the Rom file (model A32F is used as an example).

3.1 Unzip the file

3.2 Click on "SWDLoader"

3.4 Turn off your device, connect it to laptop with USB cable, the device will start to

upgrade automatically.

Caution: Don't remove the device during the upgrade

The image shows two screenshots of the 'SoftwareDownload' application interface. The top screenshot shows the download progress at 8%, and the bottom screenshot shows the download completed at 100%.
